INTRODUCTION

bone implements, and made clothing of bark cloth, skins and feathers. Barter trade with Japanese as well as Manchurian and Siberian tribes was already established, and millet was cultivated, probably introduced by the Japanese.

Chiefs called *Kotan Korokuru* (village ruling chiefs) are mentioned, but also chiefs of much larger areas, having two hundred or more retainers. In 1739 a Japanese record states that the Ainu of East Hokkaido were sturdy, and apt to defy Matsumae law.

It seems clear that the Japanese treated certain Ainu, whom they considered suitable, as paramount chiefs, but whether the Ainu themselves regarded these chiefs in this light is doubtful. However, they were able to combine against Japanese aggression in the serious rebellion of 1669 and again in 1789.

Japanese policy varied from direct aggression and prohibitions against any kind of personal contact with the native population to periods of appeasement and encouragement of the adoption of Japanese customs by the Ainu, and even miscegenation. Coastal trading posts were established, and Ainu fishermen were employed as labourers in fishing and making oilcake; they were paid in kind, which was barely sufficient for their daily needs. During the periods of forced labour they were unable to preserve and store salmon for the winter as was their custom, so when the fishing season was over they were left to starve. Hunters living away from the coast fared better; they could supply hawks, eagle feathers, skins and bear liver to the Japanese without changing their mode of life. The encouragement of agriculture in no way compensated the Ainu for the prohibitions of hunting and fishing which were, from time to time, and in various districts, imposed upon them.
